

the voice of australia's oil and gas industry

Now's the time to secure Australia's future.

Natural gas in all its forms is Australia's next resource boom and will fuel our economy for decades to come.

Australians recently voted for a government committed to new jobs and investment. So now is the time to secure 150,000 new jobs that the gas industry can create and more than \$40 billion a year in new exports; money for future schools, hospitals, and important infrastructure.

Natural gas is our natural advantage. With the right support it can secure a brighter future for Australia.
